

## Stair Tread Nosings / Safety Plates

Dynamic Grip stair safety solutions are suitable for residential, commercial, and industrial applications. To ensure pedestrian safety, stair nosings must have adequate slip resistance as well as a luminance contrast to the substrate on which it is installed.

Our extensive range of stair safety solutions include:

### INTEGRATED SAFETY NOSINGS

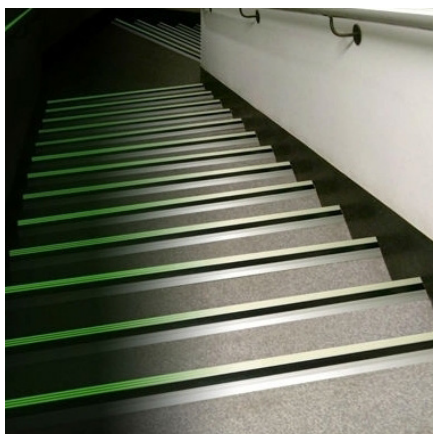

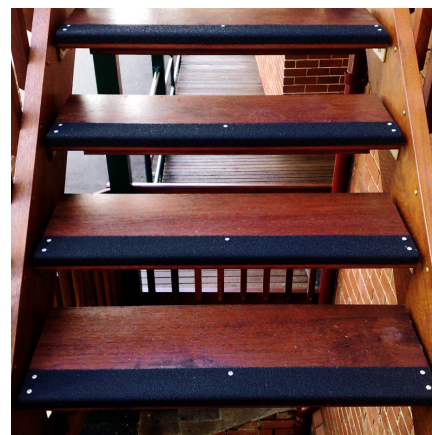

Dynamic Grip heavy duty integrated safety nosings are manufactured from reinforced aluminium extrusion and anodised to provide building owners with a long term, attractive, non-slip safety solution.

Dynamic Grip nosings are designed to provide optimum slip resistance and luminance contrast on the leading edge of stairs and protect the stair edge to enhance the service life of the stairs.

### CARBORUNDUM MODIFIED SAFETY STAIR NOSINGS

Suitable for a wide range of commercial and industrial applications, carborundum modified safety stair nosings are a cost effective stair safety application with an R13 rating. This simple, yet highly effective anti-slip solution can be purpose built for any application.

They meet BCA (Building Code of Australia) and NCC (National Construction Code) requirements and are available in a range of sizes and profiles

### PHOTO LUMINESCENT STAIR NOSINGS

To achieve maximum safety for stairs, Dynamic Grip's range of 'glow in the dark' stair nosings ensure clear visual identification of step edges when natural or artificial lighting is lost.

The photoluminescent safety stair nosings are manufactured from high strength anodised aluminium and contain an anti-slip section and a special photo-luminescent insert.
